BASIC POST TREATMENT INSTRUCTION

Wound care is performed **twice a day** (once in the morning and again in the evening). Cleanse the wound with warm water and Q-tips. Dry the wound with a Q-tip and apply Aquaphor healing ointment. Daily wound care will prevent crusting or scab formation. You may keep the wound covered during the day with a non-stick (Telfa) dressing or Band-Aid. If the wound is clean and without drainage, you need not cover it at night. You may take a shower; however, remember to reapply your dressing.

EMERGENCY CONTACT INFORMATION

Call 212-663-0400 should you have questions or concerns about your treatment.
